SOLUTIONS³ ANNOUNCES SUPPORT FOR HP SOFTWARE BUSINESS SERVICE MANAGEMENT

Wyckoff, NJ, October 22, 2007 – Solutions³ today announced sales, assessment, architecture, delivery and training services for HP Business Service Management (BSM) software to help better align their customer's IT with their business. Solutions³ can provide improved solutions to its customers leveraging new releases of HP Network Management Center, HP Operations Center, HP Business Availability Center and HP Universal CMDB.

“Solutions³ can maintain its value proposition in those areas where it has always been strong leveraging the new releases of HP BSM products and also provide additional entry points for the complete offering of HP Business Technology Optimization software,” said Mike Battistella, Solutions³ Chief Technologist & Principal.

The complete Solutions³ offering featuring HP BSM can scale to help customers manage their IT infrastructure from one central console at any location globally. This allows customers to mitigate risk and reduce their downtime.

“By using HP BSM, Solutions³ helps customers implement better business process monitoring, improved linkage to enterprise IT solutions, and ensure much faster delivery time of key IT implementations,” said Chuck Neal, Vice President, Channel and Alliances, Software, HP.

Solutions³ is an award-winning premier consulting and training organization providing expertise in IT Service Management. Solutions³ believes a complete ITSM solution addresses the three key areas of IT: **People**, **Process**, and **Technology**. This three-dimensional approach ensures that all aspects of the solution function together effectively. Through a custom training approach, Solutions³ equips **people** with the knowledge and hands-on experience to effectively manage their IT solution. This enables businesses to increase service levels, decrease costs, and improve security through the use of ITIL® based **processes**. And, by implementing best of breed software **technology**, Solutions³ provides the IT management capabilities needed to create a complete solution. Its collaborative methodology coupled with highly qualified resources results in a project that is well-defined, clearly understood and supports its client's business objectives, adding to their overall success.
