SOLUTIONS³ LLC
CAPABILITIES STATEMENT

People • Process • Technology

👤 Who We Are

Solutions³ is an award-winning consulting and training organization that provides full lifecycle solutions in Cybersecurity, IT Service Management (ITSM), and IT Operations Management (ITOM). These solutions are built on industry best practices and standards, which include, but are not limted to: ITIL®/NIST®/CPD®.

Solutions³'s complete and comprehensive solutions include innovation, thought leadership, training, and market-leading applications, all implemented by a highly qualified team, and built upon the three pillars of **People**, **Process**, and **Technology**. This collaborative approach and methodology result in projects that are clearly defined and executable, and support the business and mission objectives of our clients.

⚙ What We Do

Solutions³ provides the expertise to: **Design**, **Deploy**, **Administer**, **Operate**, and **Train** our clients with each solution we employ. Our three-dimensional approach of **People**, **Process**, and **Technology** ensures that all aspects of the solution function effectively together.

We provide the appropriate training to equip **People** with the knowledge and experience to self-sufficiently manage and administer IT and Cybersecurity solutions. We establish a continual service improvement plan, utilizing ITIL®-based and CPD®-based **Process** models. We also implement best-of-breed **Technology** to instrument and automate business solutions. Our unique training, led by instructors who are practitioners, brings valuable experience into the classroom.

THE SOLUTIONS³ APPROACH

Solutions³ utilizes proven RoadMap methodology to provide the best cost-value solutions. We first work with our clients to establish their **Current State** definition.

Based upon the business, technical, usage, application, skill, and training requirements outlined, we assist in the defining of the **Desired State** collaboratively with our clients.

Once the Current State and Desired State are defined and approved, we perform a Gap Analysis to provide a **RoadMap** and an Implementation Plan to achieve the Desired State.

The Digital Value Management System

In partnership with the DVMS Institute™, Solutions³ helps organizations of any size to **Create**, **Protect**, **Deliver**, and **Verify** trusted Digital Business/Mission value through training and mentoring programs.

Accredited by APMG International, certified by NCSC/GCHQ (UK), and recognized by DHS/CISA (USA), Solutions³ assists organizations in becoming capable of managing digital risk, resiliency, and value utilizing the Digital Value Management System™.
